

kaamdev.store — Release Notes & Known Issues

Release: v2.3.0 | Date: 12 Jul 2026 | QA Sign-off: S. Pratap Singh

1. New Features

Added multi-step service booking flow, allowing customers to select a category, sub-category, and preferred time slot before checkout.

Introduced provider rating and review system, visible on the provider profile page after a completed booking.

Added SMS notification trigger when a booking status changes to 'Confirmed' or 'Cancelled'.

2. Known Issues

BUG-441: On the booking confirmation screen, the total price occasionally displays in an incorrect currency format when the user's locale is set to a region other than India. Severity: Medium. Status: Open. Assigned: Backend team.

BUG-447: Provider search filter 'Available Today' sometimes returns providers who are actually marked unavailable, due to a timezone mismatch between the booking service and the availability service. Severity: High. Status: In Progress.

BUG-452: Uploading a profile photo larger than 5MB fails silently with no error message shown to the user. Severity: Low. Status: Open.

3. Regression Test Summary

Total test cases executed: 128. Passed: 121. Failed: 7. Blocked: 0. Failures were concentrated in the booking confirmation and provider search modules, consistent with BUG-441 and BUG-447 above.

4. Test Case Excerpt — Booking Flow

TC-102: Verify that a user can complete a booking end-to-end for a valid service category, sub-category, and time slot. Expected: booking is created with status 'Pending Confirmation' and a confirmation SMS is sent. Result: Pass.

TC-108: Verify that selecting a time slot that becomes unavailable mid-checkout shows an appropriate error and does not charge the customer. Expected: booking blocked with a clear 'slot no longer available' message. Result: Fail — see BUG-447.

5. Deployment Notes

Deployed to staging on 10 Jul 2026, promoted to production on 12 Jul 2026 after regression sign-off. Rollback plan: revert to v2.2.4 via the standard CI/CD pipeline if critical issues are found within 48 hours of release.
